HOUSEKEEPING SOLUTIONS: MULTI PRODUCT DISPENSING

Four product dispenser for the most common housekeeping applications

Extreme 4 is the premier 4 product locking enclosure, designed for ultimate dilution flexibility and accuracy while providing security and cost control under a lock and key. One dial controls up to four products at up to 8 dilutions. Flow rate for each port is either low flow, 1 gpm (4L / min.) for bottle filling or high flow, 4 gpm (15 L / min.) for bucket filling. A 2.5gpm flow rate for bottle and bucket fill option is ideal for closed loop systems when metering using an insert in bottle. Designed to be a turn-key solution, simply install metering tips required and the system is ready to go.

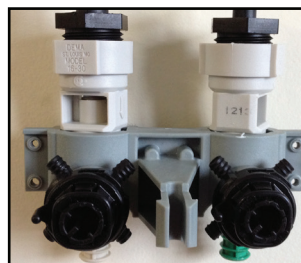

Features & Benefits

- With our patented transmission, you have one dial, four products, for a total of eight dilutions. That's right – eight dilutions under the control of one selector dial. We call that Total Dilution Control.
- One handed bottle fill activation, with our low foam fill hose. Say goodbye to two-handed bottle filling and become safer, cleaner and greener. Select your product and go!
- Metering controls are now located in the chemical compartment. No fuss, no muss. Our belief is that accessing your dilution controls should be easy, by design.
- Choose from either of our time tested bucket fill activation methods. Our push-button fill with time-proven 633 water valve or our gas pump style remote activation with over 8 years of in-field experience.
- Customization is just a phone call away. With low minimums, you can have an Extreme 4 with your branding and specifications built by our experienced team delivered to your install. Open the package, hang on the wall and you're done.

Selector Benefits and Features:

- Improved reliability
Excellent chemical resistance with AFLAS seals
- Increased ease of maintenance
No more screws! Snap-on dial
- Simplified design with reduced potential user error
Smoother detent and enhanced knob selection

Customization Benefits:

Branding is at a premium with large smooth surfaces. We can help you achieve the custom look you want out of your dispensers with relatively low effort on your part.

Large chemical shelves offer the option of bottle placement so that either the back of the bottle or the side can show through the chemical windows.
